

## GLITE R-GMA CLIENT

### 1. RELEASE DESCRIPTION

This release contains the gLite R-GMA Client module v. 4.3.1. The following sections provide additional information about the release content, the module dependencies, the known bugs and issues and a list of bugs closed since the previous release. For information about installing and using the gLite R-GMA Client, please refer to the gLite Installation and User Guides.

### 2. CHANGES IN THIS RELEASE

This release introduces the following changes:

- The GRID\_PROXY\_FILE and X509\_USER\_PROXY environment variables are not set anymore by default by the configuration script, since this creates conflicts with the job wrapper on the WN. If the variables have to be defined (for example for using the R-GMA Client in a stand-alone installation) the new system-level configuration parameter set.proxy.path can be set to true. In the gLite system, the R-GMA client is always used as part of the WN or the UI and there is no need to set this parameter
- Added missing PYTHONPATH environment variable to configuration script
- Bug fixes (please refer to the complete list later in these notes)

### 3. RELEASE CONTENTS

The gLite RGMA client v. 4.3.1 is composed of the following gLite components:

| Component name                    | Version | File   |
|-----------------------------------|---------|--|
| org.glide.deployment.rgma-client  | 4.3.1   | <a href="http://glite.web.cern.ch/glite/packages/R1.1/R20050430/installers/glite-rgma-client_installer.sh">http://glite.web.cern.ch/glite/packages/R1.1/R20050430/installers/glite-rgma-client_installer.sh</a><br><a href="http://glite.web.cern.ch/glite/packages/R1.1/R20050430/bin/rhel30/noarch/RPMS/glite-rgma-client-config-4.3.1-1.noarch.rpm">http://glite.web.cern.ch/glite/packages/R1.1/R20050430/bin/rhel30/noarch/RPMS/glite-rgma-client-config-4.3.1-1.noarch.rpm</a><br>apt-get install glite-rgma-client-config |

## 4. DEPENDENCIES

The gLite R-GMA Client module v. 4.3.1 has the following dependencies:

| Component name           | Version | RPM file name  |
|--------------------------|---------|--|
| gLITE Security Utilities | 1.0.1   | <a href="http://glite.web.cern.ch/glite/packages/R1.1/R20050430/installers/glite-security-utils_installer.sh">http://glite.web.cern.ch/glite/packages/R1.1/R20050430/installers/glite-security-utils_installer.sh</a><br><a href="http://glite.web.cern.ch/glite/packages/R1.1/R20050430/bin/rhel30/noarch/RPMS/glite-security-utils-config-1.0.1-1.noarch.rpm">http://glite.web.cern.ch/glite/packages/R1.1/R20050430/bin/rhel30/noarch/RPMS/glite-security-utils-config-1.0.1-1.noarch.rpm</a> |
| gLITE-essentials-cpp     | 1.1.1   | <a href="http://glite.web.cern.ch/glite/packages/externals/bin/rhel30/RPMS/gLite-essentials-java-1.1.1-1_EGEE.noarch.rpm">http://glite.web.cern.ch/glite/packages/externals/bin/rhel30/RPMS/gLite-essentials-java-1.1.1-1_EGEE.noarch.rpm</a>  |
| gLITE-essentials-java    | 1.2.0   | <a href="http://glite.web.cern.ch/glite/packages/externals/bin/rhel30/RPMS/gLite-essentials-java-1.2.0-2_EGEE.noarch.rpm">http://glite.web.cern.ch/glite/packages/externals/bin/rhel30/RPMS/gLite-essentials-java-1.2.0-2_EGEE.noarch.rpm</a>  |
| SWIG runtime             | 1.3.21  | <a href="http://glite.web.cern.ch/glite/packages/externals/bin/rhel30/RPMS/swig-runtime-1.3.21-1_EGEE.i386.rpm">http://glite.web.cern.ch/glite/packages/externals/bin/rhel30/RPMS/swig-runtime-1.3.21-1_EGEE.i386.rpm</a>  |

## 5. KNOWN BUGS AND ISSUES

This release has the following known bugs and issues. Bug numbers refer to the gLite Bug Tracking system database hosted on the CERN Savannah system at  
<https://savannah.cern.ch/bugs/?group=jra1mdw>.

- Many error messages are very poor. This is especially a problem with the command line tool due to messages being lost in too many layers of software. Error messages are also inconsistent between API's.
- Table and column names are currently case sensitive in RGMA. To get consistent results always respect case.
- Only a subset of SQL 92 is currently supported by RGMA, and continuous queries are even more restricted.
- Some operations of the command line tool try to access the schema and registry directly rather than just the local RGMA server. This access may be blocked by a firewall.
- The C, C++, and Python APIs and the command line tool make a new connection to the server for each API operation. When connecting to a secure server this adds a substantial overhead, so multiple API calls (e.g. lots of inserts) will run slowly. The Java API is not affected.
- No removal procedure is provided with this release apart from the removal of the RPMS. Any account, group or other resource created during the module configuration must be manually cleaned.

Known open bugs:

| Bug number | Description  |
|------------|--|
| #4284      | RGMA: error message for a non existent table is misleading |
| #4634      | RGMA scripts from EDG still present                        |

# Release Notes

Doc. Identifier:

release\_notes.doc

Date: 30/04/2005

|       |   |  |
|-------|---|--|
| #6493 | Bad case sensitivity for insert   |  |
| #6495 | insert does not check the column name   |  |
| #6496 | Bad/missing error messages with select  |  |
| #6498 | Error message could be more helpful   |  |
| #6501 | Range checking on the date stamp leaves something to be desired                               |  |
| #6568 | Could log commands to a file  |  |
| #7149 | Formatting strings for output   |  |
| #7218 | Finding the configured registry and schema  |  |
| #7220 | Bad error message with ssl error  |  |
| #7225 | All client interactions should go via the local servlet box                                   |  |
| #7226 | rgma client configuration succeeds, but a client test fails                                   |  |
| #7276 | Bad error message for expired proxy   |  |
| #7283 | Inserting \'s   |  |
| #7384 | Proxy should default to the standard location   |  |
| #7398 | C API check fails with centos?  |  |
| #7399 | API errors with expired proxy   |  |
| #7487 | the rgma client and it does not use the X509_CERT_DIR to look for the certificates of the CAs |  |
| #7543 | Add a comment "command"?  |  |
| #7633 | Would be useful to query the configured registries  |  |
| #8028 | method close() in java API wrapper unmapped to old api close()                                |  |
| #8120 | rgma-client-check does not add external libs to LD_LIBRARY_PATH                               |  |
| #8510 | lack of possibility to get/restore servlet connection in Python API                           |  |

Bugs fixed in this or previous releases, but not yet tested:

| Bug number | Description  |  |
|------------|--|--|
| #4275      | R-GMA needs a setup script to be run   |  |
| #5306      | Use GLITE_LOCATION not RGMA_HOME   |  |
| #6481      | Bad error message from show  |  |
| #6506      | Tab completion doesn't pick up "from"  |  |
| #6679      | The R-GMA client installer ignores rpm failures                              |  |
| #6828      | Incorrect instructions for creating config file when installing R-GMA client |  |
| #7293      | glite-rgma-client-config.py contains spurious lines                          |  |
| #7294      | glite-wn-config.py (glite-rgma-client-config.py) crashes with NameError      |  |
| #7397      | r-gma command-line documentation feature request                             |  |
| #7451      | CTRL-C not properly trapped in python API                                    |  |
| #7452      | Inconsistent use of stdout and stderr in java API                            |  |
| #7537      | Minor problems with read command   |  |
| #7623      | Missing documentation in command line help                                   |  |
| #7625      | Insert gives unclear warning   |  |

|       |  |  |
|-------|--|--|
| #7626 | YABEM (Yet Another Bad Error Message)                  |  |
| #7627 | Missing help for show properties                       |  |
| #7764 | Error in WN installer (glite-rgma-client_installer.sh) |  |
| #7916 | "glite-rgma-client_installer.sh if -n \$basedir; then" |  |

## 6. BUGS CLOSED SINCE LAST RELEASE

This release fixes the following bugs and issues. Bug numbers refer to the gLite Bug Tracking system database hosted on the CERN Savannah system at <https://savannah.cern.ch/bugs/?group=jra1mdw>

| Bug number | Description   |
|------------|---|
| #4290      | Another message that could be improved                                      |
| #5148      | error message for non local schema and registry are misleading              |
| #6046      | Incorrect dependencies on log4j in rgma rpms                                |
| #6274      | Unable to configure R-GMA replicated registry in the client                 |
| #6477      | Unclear error messages  |
| #6480      | Bad error message for unknown "set"   |
| #6507      | Help for select doesn't mention "order by"                                  |
| #6509      | Make commands case-insensitive  |
| #6516      | Weird behaviour with -f option  |
| #6680      | Missing gLite dependencies in glite-rgma-client_installer.sh                |
| #6980      | Distribute the code examples  |
| #6981      | Missing link to manual?   |
| #7012      | Problem in C++ manual example   |
| #7014      | C++ manual does not tell you the compiler options                           |
| #7147      | Response to ctrl-c could be better  |
| #7191      | RGMA client script fails if jre only is installed                           |
| #7245      | Error messages should be on stderr  |
| #7259      | missing env variables for RGMA client                                       |
| #7295      | glite-wn-config.py (glite-rgma-client-config.py) requires host certificates |
| #7308      | Changed behaviour with ctrl-D   |
| #7310      | Client doesn't know about multiple registries                               |
| #7409      | RGMA security   |
| #7438      | rgma-client fails to see JAVA_HOME even if set                              |
| #7593      | Documentation web page  |
| #7640      | Crash if create/drop is used  |
| #7642      | create_table fails  |

# Release Notes

## 7. PREVIOUS RELEASES

### 7.1. RELEASE 4.3.0

#### 7.1.1. Release Description

This release contains the gLite R-GMA Client module v. 4.3.0. The following sections provide additional information about the release content, the module dependencies, the known bugs and issues and a list of bugs closed since the previous release. For information about installing and using the gLite R-GMA Client, please refer to the gLite Installation and User Guides.

#### 7.1.2. Changes in this release

This release introduces the following changes:

- Added RPM-based user installation for inclusion in the gLite UI and the gLite WN
- Fixes a problem with usage of delegated proxies in the C and C++ APIs  
org.glide.rgma.api-c v. 4.1.6  
Now loads entire proxy certificate chain  
org.glide.rgma.api-cpp v 4.1.10  
Bug #7409 Fixed use of delegated proxies Producers can now set the termination interval correctly

#### 7.1.3. Release contents

The gLite RGMA client v. 4.3.0 is composed of the following gLite components:

| Component name                    | Version | File   |
|-----------------------------------|---------|--|
| org.glide.deployment.rgma-client  | 4.3.0   | <a href="http://glite.web.cern.ch/glite/packages/R1.0/R20050331/installers/glite-rgma-client_installer.sh">http://glite.web.cern.ch/glite/packages/R1.0/R20050331/installers/glite-rgma-client_installer.sh</a><br><a href="http://glite.web.cern.ch/glite/packages/R1.0/R20050331/bin/rhel30/noarch/RPMS/glite-rgma-client-config-4.3.0-1.noarch.rpm">http://glite.web.cern.ch/glite/packages/R1.0/R20050331/bin/rhel30/noarch/RPMS/glite-rgma-client-config-4.3.0-1.noarch.rpm</a> |
| org.glide.deployment.rgma-common  | 4.2.0   | <a href="http://glite.web.cern.ch/glite/packages/R1.0/R20050331/bin/rhel30/noarch/RPMS/glite-rgma-common-config-4.2.0-1.noarch.rpm">http://glite.web.cern.ch/glite/packages/R1.0/R20050331/bin/rhel30/noarch/RPMS/glite-rgma-common-config-4.2.0-1.noarch.rpm</a>  |
| org.glide.deployment.config       | 1.0.0   | <a href="http://glite.web.cern.ch/glite/packages/I22050225/bin/rhel30/noarch/RPMS/glite-config-1.0.0-1.noarch.rpm">http://glite.web.cern.ch/glite/packages/I22050225/bin/rhel30/noarch/RPMS/glite-config-1.0.0-1.noarch.rpm</a>  |
| org.glide.rgma.api-c              | 4.1.6   | <a href="http://glite.web.cern.ch/glite/packages/R1.0/R20050331/bin/rhel30/i386/RPMS/glite-rgma-api-c-4.1.6-1.i386.rpm">http://glite.web.cern.ch/glite/packages/R1.0/R20050331/bin/rhel30/i386/RPMS/glite-rgma-api-c-4.1.6-1.i386.rpm</a>  |

## 7.1.4. Dependencies

The gLite R-GMA Client module v. 4.3.0 has the following dependencies:

| Component name           | Version | RPM file name  |
|--------------------------|---------|--|
| gLITE Security Utilities | 1.0.0   | <a href="http://glite.web.cern.ch/glite/packages/R1.0/R20050331/installers/glite-security-utils_installer.sh">http://glite.web.cern.ch/glite/packages/R1.0/R20050331/installers/glite-security-utils_installer.sh</a><br><a href="http://glite.web.cern.ch/glite/packages/R1.0/R20050331/bin/rhel30/noarch/RPMS/glite-security-utils-config-1.0.0-1.noarch.rpm">http://glite.web.cern.ch/glite/packages/R1.0/R20050331/bin/rhel30/noarch/RPMS/glite-security-utils-config-1.0.0-1.noarch.rpm</a> |
| gLITE-essentials-cpp     | 1.1.1   | <a href="http://glite.web.cern.ch/glite/packages/externals/bin/rhel30/RPMS/gLite-essentials-java-1.1.1-1_EGEE.noarch.rpm">http://glite.web.cern.ch/glite/packages/externals/bin/rhel30/RPMS/gLite-essentials-java-1.1.1-1_EGEE.noarch.rpm</a>  |
| gLITE-essentials-java    | 1.2.0   | <a href="http://glite.web.cern.ch/glite/packages/externals/bin/rhel30/RPMS/gLite-essentials-java-1.2.0-2_EGEE.noarch.rpm">http://glite.web.cern.ch/glite/packages/externals/bin/rhel30/RPMS/gLite-essentials-java-1.2.0-2_EGEE.noarch.rpm</a>  |
| SWIG runtime             | 1.3.21  | <a href="http://glite.web.cern.ch/glite/packages/externals/bin/rhel30/RPMS/swig-runtime-1.3.21-1_EGEE.i386.rpm">http://glite.web.cern.ch/glite/packages/externals/bin/rhel30/RPMS/swig-runtime-1.3.21-1_EGEE.i386.rpm</a>  |

## 7.1.5. Known bugs and issues

This release has the following known bugs and issues. Bug numbers refer to the gLite Bug Tracking system database hosted on the CERN Savannah system at

<https://savannah.cern.ch/bugs/?group=jra1mdw> .

- Many error messages are very poor. This is especially a problem with the command line tool due to messages being lost in too many layers of software. Error messages are also inconsistent between API's.
- Table and column names are currently case sensitive in RGMA. To get consistent results always respect case.
- Only a subset of SQL 92 is currently supported by RGMA, and continuous queries are even more restricted.
- Some operations of the command line tool try to access the schema and registry directly rather than just the local RGMA server. This access may be blocked by a firewall.
- There is a known issue with Java 1.4.2 running with the Scientific Linux 3 SMP kernel on dual processor machines, where the Java Virtual Machine can crash without warning. The current solution is to use a non-SMP kernel. We believe this will be fixed in Java 1.4.2 08, but there is no release date for this yet. The problem does not seem to occur in RH7.3 or RHEL4.
- The C, C++, and Python APIs and the command line tool make a new connection to the server for each API operation. When connecting to a secure server this adds a substantial overhead, so multiple API calls (e.g. lots of inserts) will run slowly. The Java API is not affected.
- All VO's share the same name space and information.
- Authentication is enabled by default. To use the RGMA Browser you must load your certificate into the web browser.
- No removal procedure is provided with this release apart from the removal of the RPMS. Any account, group or other resource created during the module configuration must be manually cleaned.

Known open bugs:

# Release Notes

Doc. Identifier:

release\_notes.doc

Date: 30/04/2005

| Bug number | Description   |  |
|------------|---|--|
| #7225      | All client interactions should go via the local servlet box                                   |  |
| #7226      | rgma client configuration succeeds, but a client test fails                                   |  |
| #7438      | rgma-client fails to see JAVA_HOME even if set  |  |
| #7487      | the rgma client and it does not use the X509_CERT_DIR to look for the certificates of the CAs |  |
| #7702      | ClientAuthentication.props SSL values missing   |  |

Bugs fixed in this or previous releases, but not yet tested:

| Bug number | Description  |  |
|------------|--|--|
| #6046      | Incorrect dependencies on log4j in rgma rpms                                 |  |
| #6249      | gLITE Installation Guide - corrections for rgma                              |  |
| #6274      | Unable to configure R-GMA replicated registry in the client                  |  |
| #6679      | The R-GMA client installer ignores rpm failures                              |  |
| #6680      | Missing gLite dependencies in glite-rgma-client_installer.sh                 |  |
| #6828      | Incorrect instructions for creating config file when installing R-GMA client |  |
| #7191      | RGMA client script fails if jre only is installed                            |  |
| #7259      | missing env variables for RGMA client  |  |
| #7293      | glite-rgma-client-config.py contains spurious lines                          |  |
| #7294      | glite-wn-config.py (glite-rgma-client-config.py) crashes with NameError      |  |
| #7295      | glite-wn-config.py (glite-rgma-client-config.py) requires host certificates  |  |
| #7310      | Client doesn't know about multiple registries                                |  |

## 7.1.6. Bugs closed since last release

This release fixes the following bugs and issues. Bug numbers refer to the gLite Bug Tracking system database hosted on the CERN Savannah system at <https://savannah.cern.ch/bugs/?group=jra1mdw>

| Bug number | Description  |
|------------|--|
| #4667      | help instructions are wrong in the rgma client tool                                    |
| #4668      | incorrect information in the client side rgma.props file only affects certain commands |
| #7297      | glite-rgma-client-config.py contains CVS conflicts and won't compile                   |
