

GLITE R-GMA CLIENT

1. RELEASE DESCRIPTION

This release contains the gLite R-GMA Client module v. 5.0.0. The following sections provide additional information about the release content, the module dependencies, the known bugs and issues and a list of bugs closed since the previous release. For information about installing and using the gLite R-GMA Client, please refer to the gLite Installation and User Guides.

2. CHANGES IN THIS RELEASE

This release introduces the following changes:

- Functionality changes:
 - R-GMA uses new Glue tables for schema and registry
 - R-GMA server and clients can run in secure and insecure mode:
 - The server always runs in secure mode, the insecure mode can be enabled in addition.
 - Clients can connect to the server either via the secure or via the insecure port (if enabled)
 - This module is compatible with the LCG release 2.4.0
- Deployment and configuration changes:
 - Command line changes for configuration script:
 - No option given shows help
 - --configure configures service
 - Configuration parameters
 - `rgma.secure.mode` added (change between secure and insecure mode)
 - Support of secure (using port 8443) and insecure mode (using port 8080)
- Bug fixes (please refer to the complete list later in these notes)

There is a known incompatibility between gLite release 1.1 and 1.2. For details and workarounds in the R-GMA server to run 1.1 clients (e.g. the R-GMA servicetool) publishing in a 1.2 server, please see the R-GMA server release notes.
