5. KNOWN BUGS AND ISSUES

Bug numbers refer to the gLite Bug Tracking system database hosted on the CERN Savannah system at <https://savannah.cern.ch/bugs/?group=jralmdw>.

- glite put/get fails while putting files bigger than 2 Gb. This is due to the CLI failing to read the local file if large file flag are not specified at build time. The problem is being worked on.
- No removal procedure is provided with this release apart from the removal of the RPMS. Any account, group or other resource created during the module configuration must be manually cleaned.

Known open bugs:

Bug number	Description	
#7765	gLITE I/O Improve glite-io-client error reporting	
#10045	glite-io-client-config does not accept --subservice argument	
#10764	io-clients: service URL parsing needs improvement, just like service details parsing	

The following bugs have been fixed in this or previous releases, but they have not been tested yet:
